

Application Serial No. 09/476,334  
Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

 Claim 1 - 70 (Canceled)

 Claim 71 (Currently Amended): A data copyright management method comprising:  
encrypting unencrypted copyrighted data using a first secret-key;  
supplying the encrypted data to a primary user;  
decrypting the encrypted data using said first secret-key;  
displaying the decrypted data;  
re-encrypting said decrypted data using a second secret-key; and  
handling storing, copying [or] and transferring operations on the copyrighted data using said  
re-encrypted data and not said decrypted data.

Claim 72 (Previously Presented): A data copyright management method comprising:  
encrypting unencrypted copyrighted data using a first secret-key;  
supplying the encrypted data to a primary user;  
decrypting the encrypted data using said first secret-key;  
displaying the decrypted data;  
re-encrypting said decrypted data using a second secret-key;

Application Serial No. 09/476,334  
Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

handling storing, copying and transferring operations on the copyrighted data using said re-encrypted data and not said decrypted data;

editing said decrypted data to produce unencrypted edited data;

encrypting the unencrypted edited data using said second secret-key; and

handling storing, copying and transferring operations on said encrypted edited data and not

the unencrypted edited data.

Claim 73 (Previously Presented): A data copyright management method, comprising:

encrypting unencrypted copyrighted data using a first secret-key;

supplying the encrypted copyrighted data to a primary user;

decrypting the encrypted copyrighted data using said first secret-key;

displaying the decrypted copyrighted data;

re-encrypting said decrypted copyrighted data using a second secret-key; and

handling storing, copying and transferring operations on the copyrighted data using said re-encrypted data and not the decrypted data,

wherein at least one of said decrypting and re-encrypting steps is carried out using a copyright control program.

Claim 74 (Previously Presented): A data copyright management method, comprising:

encrypting unencrypted copyrighted data using a first secret-key;

Application Serial No. 09/476,334  
Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

111  
111  
supplying the encrypted copyrighted data to a primary user;  
decrypting the encrypted copyrighted data using said first secret-key;  
displaying the decrypted copyrighted data;  
re-encrypting said decrypted copyrighted data using a second secret-key;  
editing said decrypted copyrighted data to produce unencrypted edited copyrighted data;  
encrypting the unencrypted copyrighted edited data using said second secret-key;  
handling storing, copying and transferring operations on the copyrighted data using said re-  
encrypted data and not the decrypted data; and  
handling storing, copying and transferring operations on the copyrighted edited data using  
said encrypted edited data and not the unencrypted edited data,  
wherein at least one of said decrypting and encrypting steps is carried out by a copyright  
control program.

Claim 75 (Previously Presented): A data copyright management method according to claim  
73, further comprising pre-storing said copyright control program in a ROM of a user terminal used  
by said primary user and said secondary user.

Claim 76 (Previously Presented): A data copyright management method according to claim  
74, further comprising pre-storing said copyright control program in a ROM of a user terminal used  
by said primary user and said secondary user.

Application Serial No. 09/476,334  
Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

Claim 77 (Previously Presented): A data copyright management method according to claim 73, further comprising pre-storing said copyright control program in an area managed by an operating system of a user terminal used by said primary user and said secondary user.

Claim 78 (Previously Presented): A data copyright management method according to claim 74, further comprising pre-storing said copyright control program in an area managed by an operating system of a user terminal used by said primary user and said secondary user.

 Claim 79 (Previously Presented): A data copyright management method comprising:  
adding copyright information to unencrypted data;  
encrypting said unencrypted copyrighted data using a first secret-key;  
supplying the encrypted data having the copyright information to a primary user;  
decrypting the encrypted data using said first secret-key to produce decrypted data having the copyright information;  
displaying the decrypted data;  
re-encrypting said decrypted data using a second secret-key to produce re-encrypted data having the copyright information; and  
handling storing, copying and transferring operations on the copyrighted data using said re-encrypted data and not said decrypted data.

Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

*871* Claim 80 (Previously Presented): A data copyright management method according to claim 72, further comprising adding copyright information to said encrypted edited data.

---

*Sub 81* Claim 81 (New): A data copyright management method for managing copyrights of data comprising:

*82* encrypting unencrypted copyrighted data using a first secret-key;  
supplying the encrypted data to a user;  
permitting the user to decrypt the encrypted data by using the first secret-key to display the decrypted data;  
making the user re-encrypt said decrypted data using a second secret-key when said data is stored.

Claim 82 (New): A data copyright management system according to claim 81 further comprising making the user re-encrypt said decrypted data using the second secret-key when said data is copied.

Claim 83 (New): A data copyright management system according to claim 81 further comprising making the user re-encrypt said decrypted data using the second secret-key when said data is transferred.

Application Serial No. 09/476,334  
Amendment dated July 31, 2003  
Reply to Office Action of April 2, 2003

Claim 84 (New): A data copyright management system according to claim 82 further comprising making the user re-encrypt said decrypted data using the second secret-key when said data is transferred.

Claim 85 (New): A data copyright management system according to claim 81, wherein the step of making is carried out through a copyright control program.

Claim 86 (New): A data copyright management system according to claim 82, wherein the step of making is carried out through a copyright control program.

Claim 87 (New): A data copyright management system according to claim 83, wherein the step of making is carried out through a copyright control program.
